Solution Architect | AI, Cloud & Distributed Systems | Enterprise
Architecture | Engineering Leadership | AWS | Azure | LLMs |
Agentic AI

Pune Division, Maharashtra, India

Summary

Solution Architect | AI & Cloud Transformation | Engineering
LeaderSolution Architect with 13+ years of experience building
scalable enterprise systems and AI-driven platforms, specializing
in agent-based architectures. Driving production-grade retrieval
systems with end-to-end ownership, optimizing cost, latency, and
reliability at scale.I specialize in building cloud-native architectures
and delivering high-impact solutions aligned with business goals.
Built an AI-powered chatbot to interactively showcase my experience
and projects.AI System Architecture & Production Experience-
 Owned the retrieval layer for a customer-facing AI agent
handling 20,000+ daily queries, including architecture design,
cost - latency optimization, and incident management.-
Improved retrieval precision by 31pp by implementing hybrid
search (vector + BM25), addressing 18% loss on long-tail
queries with only +22ms latency overhead.- Designed
and deployed a guardrail system after a prompt injection incident
that misrouted 0.4% of production queries to unintended tool
endpoints, implementing policy enforcement at the I/O boundary to
prevent recurrence.- Architecting an AI-driven QA
automation platform to autonomously generate, execute, and report
test cases end-to-end - targeting elimination of manual QA
effort and full SDLC test coverage.- Delivered an AI-powered
insights platform (Azure OpenAI, RAG, LangChain) automating 100+
reports/day. Reduced analyst effort by 70%+, accelerating
enterprise insights and decision-making.Key Highlights:• Architected
AI-powered platforms using OpenAI SDK, CrewAI, LLMs, and
RAG on Azure OpenAI, enabling scalable multi-agent systems and
intelligent automation workflows.• Designed scalable systems on
AWS handling millions of requests• Led SaaS product development
with strong customer adoption• Improved performance by 30–40%
and ensured 99.9% uptime• Managed and mentored teams of 10+
engineers Core Skills:Cloud Architecture • AI Architecture • Solution

Experience

MathCo

Platform Solution Architect

February 2023 - May 2026 (3 years 4 months)

India

Driving enterprise architecture, AI-led innovation, and scalable platform engineering across global data products.

- * Owned the retrieval layer for a customer-facing AI agent handling 20,000+ daily queries, including architecture design, cost - latency optimization, and incident management.

- * Architecting an AI-driven QA automation platform (in active development) to autonomously generate, execute, and report test cases end-to-end — targeting elimination of manual QA effort and full SDLC test coverage.

- * Architected and delivered an AI-powered insights platform using Azure OpenAI and GenAI stack (LangChain, RAG, Pinecone, pgvector) on Azure, enabling automated summarization of reports and dashboards and significantly improving enterprise data-driven decision-making.

- * Led end-to-end architecture and client deployment of the NucliOS (AWS/Azure), implementing OAuth2, SSO, rate limiting, CI/CD pipeline and ensuring reliability through observability CloudWatch and messaging (Azure Service Bus), improving system performance and contributing to higher client onboarding and platform adoption.

- * Designed and implemented an end-to-end scalable Notification System supporting multi-channel delivery (Email, SMS, Push) using event-driven architecture.

* Cut cloud costs by ~25% (~\$300/month) using auto-scaling instead of fixed server configurations.

Automated dev/QA scaling (weekend downscale, weekday upscale) for efficient resource utilization.

* Improved NucliOS platform performance by 10x (3s → 300ms) by redesigning system architecture, implementing server-side pagination and message queueing, enabling seamless scalability for 50K+ users.

* Built and scaled the engineering team from scratch to 10+ members, mentoring engineers and tech leads to drive high-quality delivery, ownership, and engineering excellence.

* Introduced ADRs (Architecture Decision Records) and RFC processes, reducing production incidents by 30% and onboarding time for new engineers.

Stefanini Group

Technical Lead

January 2022 - January 2023 (1 year 1 month)

Pune District

Technical Lead – Zorro Project (Syngenta)

- Led delivery of a global, multi-region product across 6+ countries (US & Europe), managing a team of 6 engineers and meeting all delivery deadlines across every region without exception.

- Drove end-to-end system modernization (migration, modularization, CI/CD), reducing production bugs and incidents through enforced code quality standards, peer reviews, and automated testing pipelines.

- Owned architecture and engineering leadership across a distributed team - establishing best practices that improved system maintainability, scalability, and release confidence.

UST Xpanxion

1 year 10 months

Associate Leader - Software

March 2020 - December 2021 (1 year 10 months)

Pune Division

- Built personalized web and email experiences using Monetate, driving customer engagement improvements for a global client across 5+ regions.
- Developed reusable SDKs and modules (React, TypeScript, Monorepo) that standardized and accelerated personalization integration across the client's product suite.
- Won a client-side hackathon by building a voice-enabled web experience — selected as the winning solution among competing teams for innovation and technical execution.

Software Associate

March 2020 - December 2021 (1 year 10 months)

Built personalized web and email experiences using Monetate, driving customer engagement improvements for a global client across 5+ regions. Developed reusable SDKs and modules (React, TypeScript, Monorepo) that standardized and accelerated personalization integration across the client's product suite. Won a client-side hackathon by building a voice-enabled web experience — selected as the winning solution among competing teams for innovation and technical execution.

Reliance Industries Limited

1 year 6 months

Full Stack Developer

October 2018 - March 2020 (1 year 6 months)

Navi Mumbai

* Delivered an AI-powered Employee Virtual Assistant for Reliance's EmpXP platform, used by 200K+ employees, reducing HR query resolution time by 50% and improving employee experience

* Contributed to the Employee Experience Platform (EmpXP), developing a unified HR interface using Angular, Node.js, and MongoDB for seamless service access.

Full Stack Engineer

October 2018 - March 2020 (1 year 6 months)

Delivered an AI-powered Employee Virtual Assistant for Reliance's EmpXP platform, used by 200K+ employees, reducing HR query resolution time by 50% and improving employee experience.

sumHR

Senior Software Engineer

April 2016 - September 2018 (2 years 6 months)

Mumbai Area, India

- * Built and scaled HRMS & Payroll SaaS supporting 500+ organizations, while leading a team and delivering high customer satisfaction through Agile execution.

- * Led a team of 5+ engineers, delivering customer-focused solutions using Agile practices, resulting in high satisfaction and repeat business.

eBrandz Solutions Pvt. Ltd.

1 year 10 months

PHP Programmer

June 2014 - March 2016 (1 year 10 months)

Mumbai Metropolitan Region

- * Developed a system that Scraped 40+ site content (NAP details and reviews).
- * Leading and mentoring a team of new hires, providing guidance and training.
- * Collaborating across teams to ensure smooth operations and conflict resolution.

Senior Software Engineer

June 2014 - March 2016 (1 year 10 months)

Built and maintained RESTful APIs (PHP) for the Brand360 mobile app, including content aggregation from third-party platforms via web scraping.

trimatrixsoftware solution

Software Engineer (Internship/Freelance)

April 2013 - May 2014 (1 year 2 months)

Nashik

- * Developed and enhanced a Personnel GPS Tracking System, enabling real-time tracking of field employees and improving operational visibility.
- * Optimized system performance and features using JavaScript, PHP, and MySQL, ensuring reliable and scalable application delivery.

Education

Pune University

Master of Computer Applications (MCA), Computer Science · (2010 - April 2013)

Savitribai Phule Pune University

BSc Computer Science (B.Sc CS), Computer Science · (April 2007 - April 2010)

Savitribai Phule Pune University

HSC, Science · (2006 - February 2007)

CDO Meri High school

· (2000 - 2005)
