Summary

With over 12+ years of experience as a software developer, I am an energetic and results-driven individual who specializes in software development. My expertise in the field makes me a subject matter expert, consistently delivering exceptional results.

As a highly resourceful and innovative software developer, I bring extensive experience in full-stack application development to the table. My competency in the field allows me to deliver exceptional results consistently.

As a technology enthusiast, geek, and passionate programmer, I fell in love with computers and the endless possibilities they offer

I have a wealth of experience building enterprise-level AI-powered voice virtual assistants.

I have successfully built a SaaS product for loyal customers, focused on crop protection.

I have managed the successful delivery of a cross-industry customer portfolio across multiple countries, including the US, Russia, Romania, Bulgaria, and Hungary.

As a leader, I have managed and mentored a team of 10+ highly skilled software engineers, delivering exceptional results through effective guidance and support.

I'm a passionate developer on a mission to make a positive impact in the tech world. With a commitment to open source and community collaboration, I believe in the power of code to bring about change.

GitHub Profile: <https://github.com/vishalkhoje>

Microsoft Learning Profile: <https://learn.microsoft.com/en-us/users/vishalkhoje/>

Through my GitHub contributions, I've had the privilege of working on a variety of exciting projects, and I'm always eager to learn, grow, and share knowledge with the community.

Expertise:

- * Backend Programming: NodeJS, ExpressJs, Python, Serverless, Type-ORM, PHP (MVC), Apache/Nginx, Docker.
- * Database: GraphQL, RDBMS (MySQL), NoSQL (MongoDB), DynamoDB, PostgreSQL
- * Frontend: JavaScript, JS(ES6/ES7/ES8), TypeScript, ReactJs, Angular, Redux, React-Query, HTML5, CSS, CSS3, Tailwind CSS, Ant-Design, Bootstrap, jQuery.
- * Technologies: Chatbot/Voicebot, Dialogflow, Amazon Webservices (AWS), Docker, AWS - ECS SCR, Apache Kafka, Redis, Restful APIs.
- * Project Management Tools: Agile, Confluence, Jira, GIT, CI/CD, CircleCI, Azure DevOps
- * Monitoring tools: Epsagon, Sentry, Azure Insights and Grafana

Experience

MathCo

Platform Solution Architect

February 2023 - Present (3 years 2 months)

India

In my current position at NucliOS, a subsidiary of TheMathCompany Industry, I am actively involved in driving the company's growth and advancement. With a strong command over various technologies, including JavaScript, React.js, Python, and Azure, I contribute to critical aspects such as Architecture Planning, Performance Optimization, and database management with PostgreSQL.

- Implemented automated insights and summarization of reports and charts in Co.dx (NucliOS) project using Azure OpenAI for data-driven decision-making.

- Accountable for delivering architectural solutions in presales application development assignments.
- Reduced monthly server costs by approximately 25%
- Enhance application performance by reducing the page load time from 3 seconds to 300 milliseconds.
- Upgrade the entire ReactJS application from version 16.x to 18.x.
- Migrate a Create React App (CRA) project to Vite.
- Migrated the entire application to Dockerization, including the frontend, backend, and database.
- Ensuring the quality of design and code through thorough review and assessment.
- Accountable for mentoring and guiding senior engineers, and technical leads.
- Actively participating in code writing, code walkthroughs, and reviews.
- Collaborating with multiple teams to ensure seamless operations and resolution of conflicts.
- Enhanced CI/CD pipeline for PRs, requiring passing tests, resolved comments, and mandatory approval by two reviewers for merge.
- Consistent identification, documentation, and education of best practices and coding standards in the development discipline.

Stefanini Group

Technical Lead

January 2022 - January 2023 (1 year 1 month)

Pune, Maharashtra, India

In my role as a leader in the Zorro project, I successfully managed the delivery of a diverse customer portfolio across industries and countries, including the US, Russia, Romania, Bulgaria, and Hungary.

- The Zorro project focuses on providing loyal Syngenta customers with effective crop protection solutions and mitigating risks associated with market fluctuations.
- I played a key role in seamless migration, CI/CD implementation, core module development, application modularization, and ensuring high code quality.
- Led a skilled team, offered technical guidance, and integrated monitoring for system optimization.
- Expanded and managed accounts, fostering technical partnerships with clients.
- Led, guided, and trained a team in full-stack web app development.

- Ensured best practices in the development and delivery of large-scale applications.
- Sprint Planning, Task Allotment, and providing good estimating support.

Xpanxion

Associate Leader - Software

March 2020 - December 2021 (1 year 10 months)

Pune, Maharashtra, India

At UST BlueConch Technologies (Xpanxion), I leverage my skills in JavaScript, React.js, custom package creation, Monorepo, React-Native, and basic Python to contribute to the organization's development. I also had a key role at Monetate, configuring personalized web and email experiences tailored to regions and user needs, boosting customer engagement

- Customized web and email experiences on Monetate for specific regions and user needs.
- Collaborating directly with the client team to provide consultative solutions that generate value
- Developed the Product Finder module and SDK custom package for Monetate.
- Created an e-commerce sample app using React or React Native for custom package testing.
- Created custom packages for mobile and web apps using JavaScript, TypeScript, Monorepo, yarn workspaces, and Lerna to consume the Monetate API.
- Enforcing the establishment and adherence to sound unit testing principles.
- Implemented the React Product Finder module, generating quiz experiences on customer websites.
- Sprint Planning, Task Allotment, and providing good estimating support.

* Notably, I won an internal Hackathon competition by integrating voice recognition into Monetate's web application, delivering a unique and innovative user experience.

Reliance Industries Limited

Full Stack Developer

October 2018 - March 2020 (1 year 6 months)

Navi Mumbai

At Reliance Industry, I am contributing to its development with my experience in technology like Dialogflow AI-Virtual-Assistant, Angular 6, JavaScript, Node Js, Express Js, MongoDB, and PHP- Laravel.

Worked on Dialogflow (API.AI) for building conversational Employee Virtual Assistant (chat-bot).

Employee Xperience Platform (EmpXP) serves as a single window, integrated interface for all HR services.

The application provides a conversational Employee Virtual Assistant (EVA) for automated solving of employee queries.

sumHR

Senior Software Engineer

April 2016 - September 2018 (2 years 6 months)

Mumbai Area, India

At sumHR, I am contributing to its development with my experience in technology like PHP, MongoDB, MySQL, JavaScript , JQuery, Cloud computing, Linode, AWS (EC2), AWS (SES), AWS (RDS), Node Js, Express Js, CloudAMQP-RabbitMQ, Apache , Nginx, and PHP frameworks - Yii, Laravel, React Js

- Built HRMS and Payroll software (SaaS) which support more than 500 organizations.
- Handling and leading a team of more than five members.
- Responded quickly to complex customer requirements using Agile Methodology leading to high customer satisfaction and repeat business.

eBrandz Solutions Pvt. Ltd.

PHP Programmer

June 2014 - March 2016 (1 year 10 months)

Mumbai Area, India

- Developed a system that Scraped 40+ site content (NAP details and reviews).
- Leading and mentoring a team of new hires, providing guidance and training.
- Collaborating across teams to ensure smooth operations and conflict resolution.

trimatrixsoftware solution

Software Engineer

April 2013 - May 2014 (1 year 2 months)

Nashik

As a valued member of Trimatrix Software Solutions, I actively contribute to the development of the Personnel GPS Tracking System. This system serves the purpose of tracking employees who work away from the organization, including marketing executives and survey executives.

Leveraging my expertise in technologies like JavaScript, HTML, CSS, MySQL, and PHP, I play a vital role in enhancing the system's features and optimizing its performance.

Through my contributions, I contribute to the growth and success of Trimatrix Software Solutions.

Education

Pune University
